HYPOXI® Vietnam – “TIME TO BLOOM” Event

Straß im Attergau, August 2024

We are delighted to present the highly anticipated “TIME TO BLOOM” event, an amazing awards and recognition ceremony successfully hosted by HYPOXI Vietnam on June 15th.

An extraordinary evening to honor and celebrate the remarkable achievements of the clients and influencers who embarked on the 6-week body transformation program “The Glow Up Journey”.

Over the past six weeks, participants have shown incredible dedication and commitment to achieving their goals.

We are proud to announce that together they achieved a phenomenal reduction in total circumference of 2100 cm.

This impressive achievement is a testament to hard work and perseverance, but also to the unique effectiveness of the HYPOXI program.

The “TIME TO BLOOM” event was a night of inspiration, motivation and celebration.

It showcased the highlights of everyone’s journey to personal transformation with a positive body change and a shift to a healthier lifestyle.

An unforgettable evening full of joy and camaraderie, where the participants were recognized, and their great results were celebrated.

Special thanks to all those who attended and helped make this event a great success.

The HYPOXI® devices at a glance:

HYPOXI-Trainer® S120

The S120 combines the three components of HYPOXI-Method® effectively: The computer-controlled alternation of high and low pressure takes place in a chamber that reaches up to the hips. The gentle exercise takes place sitting on the integrated bicycle ergometer. This puts the problem areas – hip, underbelly, buttocks and legs - under pressure, facilitates the activity of the veins and eliminates fat in a targeted manner.

HYPOXI-Trainer® L250

The L250 permits the alternating application of low-pressure for the underbelly, hip, behind and legs. The comfortable reclined position relieves the body of most of its weight during training and promotes the elimination of liquids and toxins. The results are beautiful, slender legs and a visible reduction of cellulite.

HYPOXI-Vacunaut®

The Vacunaut is used to reduce the girth of the stomach and hips. Training is performed in the HYPOXI®-PressureSuit with an integrated network of 122 high and low pressure chambers.

During moderate exercise - which can take place on a treadmill, exercise bicycle or other popular cardiovascular exercise equipment - the application of high and low pressure targets the abdomen and hips.

HYPOXI® HD-Comfort

In order to remain firm and strong the skin needs special treatments. 400 active vacuum chambers integrated in the problem areas in HYPOXI® HD-PressureSuit ensure that the skin gets the exercise it needs. A comfortable lounge chair with integrated high and low-pressure technology ensures pleasant relaxation while the elastic connective fibres of the skin work diligently to achieve smooth, firm skin.
